Message from the Editor

Good Trekking all!

This month's issue feature the best articles from Star Time volume's 1 and 2.

So, no fresh articles, just a collection of all the best article from volume 1, issue 1 through Volume 2, issue 6.

I hope you will enjoy this little feature, and consider it my little treat from me to you.

Thanks in advance,

You editor,
ST Hobbs

Commanding Officers Log

Submitted By: Capt. ST Hobbs, CO

“Commanding Officers Report”

Submitted By: LT Shelby T. “Sakkhet” Hobbs, PCO

On SD 0911.27 (Earth Date: 11/27/2009) the Planetary Outpost Stephen Hawking had its first meeting. The time was 1500 hours (3 pm est.) and 2 out of the 3 Stephen Hawking crew were in attendance, with 2 guests from the USS Brightstar attending.

The meeting was opened by Commanding Officer, LT Shelby T. “Sakkhet” Hobbs, PCO. The 2 guests from The USS Brightstar were greeted and welcomed into the meeting.

PCO S.T. Hobbs gave opening statements and then turned the floor to Chief Medical Officer, LT Renee’ L. Hobbs, CMO.

CMO R.L. Hobbs gave her opening statements and then gave her medical report.

CMO R.L. Hobbs then turned the floor back to PCO S.T. Hobbs, who closed the first meeting of the Planetary Outpost Stephen Hawking.

First/Chief Engineering Officers Log

“First Officers/Chief of Engineering Report”

Submitted By: LTJg Shelby R. Hobbs, FO/CEO

I Shelby Hobbs the First Officer of the Stephen Hawking Outpost would like to report that we have been successful in all of our endeavors. We have set a goal to recruit at least one new member this year. Supporting the Hendricks county March of Dimes is just one of many charitable contributions. The members of the Outpost have ensured that all departments are complying with Star Fleet regulations.

A system that provides control of location and attitude of spacecraft by using rocket engines to generate motion. Spacecraft propulsion systems come in various forms depending on the specific mission requirements. Each exhibits considerable variation in such parameters as thrust, specific impulse, propellant mass and type, pressurization schemes, cost, and materials. All of these variables must be considered in deciding which propulsion system is best suited to a given mission. Typical spacecraft applications include communications satellites, science and technology spacecraft, and Earth-monitoring missions such as weather satellites. Orbital environments range from low-Earth to geosynchronous to interplanetary. See also Astronautically engineering; Rocket propulsion; Satellite (spacecraft); Space flight; Space probe; Specific impulse. The highlighted blue areas will be discussed in future articles.

Executive Officers Log

Submitted By: Ens. I Jinks, XO/CQO

I came onto the P.O. Stephen Hawking in Sept. of 2010, and was soon engaged in activities of the unit. To my knowledge, I was going to be CXO when I made 2Lt, and would be in charge of planning all the away missions.

I had made plans for several away missions for the P.O. Stephen Hawking, but unfortunately, we were unable to go on any of them due to the family emergencies of the CO. Now we are the U.S.S. Telek, and I will be planning some great new away missions, and hopefully, will be able to go on them starting this summer.

I have agreed to learn judo from our CRO, and will start my lessons this summer. The CO has also agreed to learn judo from the CRO, and this should be fun.

I cannot wait for what 2011 will bring, and hope we will prosper as the U.S.S. Telek NCC-46112. he CXO when I made 2Lt, and would be in charge of planning all the away missions.

“Chief Security Officers Report”

Submitted by: Cadet Nick Manns, RCDDT

Bangkok, Thailand is facing major security breaches this month when a large groups of protesters started to revolt in the city hurling rock, Molotov cocktails, shooting slingshots, and other projectiles. Thailand’s military responded quickly and started flagging neighborhoods and streets that were the primary spots of protesting violence as “Live firing zones”. The revolt started after a large group of people demanded a recount of votes in an election and didn’t get it. At first they simply burned tires in the streets creating black smoke to blind the military, but resorted to physical violence when their voices weren’t heard. The leaders known as „Redshirts“ have given up to degree but violence has not ceased in the streets as of yet, but, the military should put this „fire“ out fairly quick. The current death toll is 30 deaths and 232 injured as of now, as troops continue to fire high-powered rifles behind sandbags at the enemy protesters camps. It does not look like the protestors or the military for that matter are ready to give up anytime soon.

Chief Medical Officers Log

Submitted By: Cmdr. RL Hobbs, CMO

"Gross Human Anatomy"

Submitted By: LT Renee L. Hobbs, CMO

This is an anatomy class that medical students take in medical school, and nursing students take in a degree program.

In this class, the students have cadavers on which to learn. The cadavers are deceased people who have willed their bodies to science. The students study and learn about muscles, bones, ligaments, tendons and organs, etc.

The bodies have been embalmed with formaldehyde, which is very odorific. A mask may be worn if necessary.

Students spend many hours in the lab, studying their cadavers. This class is very conducive to learning, and is great when used in conjunction with the medical books.

Some of the procedures the students practice are: sutures, removing organs, IV's, bandaging, repairing damages, veins and arteries studies, etc.

Cadavers are very wonderful devises for learning. More people need to be either organ donors, and/or full body donors to science. Make sure to put this information on your driver's license, and let your family members know your wishes.

Chief S&R Officers Log

Submitted By: LTjg. I Jinks, CQO

"Chief Marine officers report"

Submitted By: Cadet Isaac Jinks, XCDT

I have made a continuing report on the previous log. Our away missions are being put into order. Our first away mission is going to be towards Grissom Aero base; our alternative is Indianapolis zoo. Our second away mission would be towards the Devils punch bowl; alternative is towards Turkey run national Park. All have been cool cooperatively made with CRO Nick Manns.

U.S.S. Telek News

Submitted By: Capt. ST Hobbs, CO

The U.S.S. Telek has just been recommissioned from the P.O. Stephen Hawking, on SD 1101.15 (ED 15, Jan. 2011).

With this new commissioning, we have updated our website to accommodate our new name and classification, as well as our facebook page, Twitter account and MySpace accounts.

Since we are now the U.S.S. Telek, we have changed the names on two of our ship level awards, the P.O. Stephen Hawking Excellence award is now the U.S.S. Telek Excellence award, and the P.O. Stephen Hawking Newsletter Article of the Month award is now the U.S.S. Telek Newsletter Article of the Month award. The recipients of any awards that were given under the P.O. Stephen Hawking will be re-given under the U.S.S. Telek.

FYI—our new web address for the U.S.S. Telek is, www.usstelek.com, and our old web addy, www.stephenhawking-sfcq1.com, will still take you to our official website along with our new web addy. Be sure to catch out next issue for more up-to-date U.S.S. Telek News.

Star Trek Bathrobes

Posted by T'Bonz - 02/03/11 at 10:03 am

Star Trek fans needing a robe to go over their Federation jammies are in luck, with the announcement of a new line of *Star Trek* bathrobes courtesy of ThinkGeek.

Officially licensed by CBS, the new robes come complete with embroidered rank and department insignia and will be available in Command gold or Sciences blue.

The terrycloth robes, which sell for \$49.99 each, are made of 100% cotton and measure forty-nine inches in length, with thirty-four inch sleeves, with room for a waist up to fifty-inches.

Starbase Indy will *NOT* be held on the Thanksgiving weekend of Nov. 25-27, 2011, but instead will be held on Dec. 9-11, 2011.

SBI already has two guests, John Billingsley and his wife Bonita Friedericy.

John played Dr. Phlox on *Star Trek: Enterprise*, while his wife Bonita currently plays General Diane Beckman on the hit television series *Chuck*.

Both John and Bonita will be with SBI all weekend, and will also attend the Dinner with the Stars.

So get you tix now, before it's too late!

Chaplain's Bulletin

Submitted By: Capt. ST Hobbs, CO

Taken from the Baptist Bread devotional

Submitted by: CAPT Shelby T Hobbs,
PCO and Chaplain

"The Christmas Dinner Guest"

—Traditionally the Chaplain's Bulletin would have an insert from the Baptist Bread devotional, but since this is the Christmas 2010 Edition Star Times Issue, I thought I would present the following Christmas story...ll— CAPT ST Hobbs, PCO and Chaplain

It was around 9 pm on December the 23rd. when G-d spoke to me; G-d said unto me, go and prepare a feast for me, Jesus your L-rd and Savior am to visit you on Christmas Eve and will dine with you and I shall be with you at 10 pm sharp. So in the moment I was stunned. I knew not of what to think. But thought with heavy heart, for as to have my Messiah as my dinner guest on the Eve of Christmas, I prepared a feast. It was a grand feast that would surely please my L-rd. As December 24th came to be, with the feast laid out, I waited as the clock toned 10 pm. As to my surprise, a knock at my door, I was anxious, and as I answered the call, to my surprise, it was an old beggar. She asked me if I had anything to eat and although I was awaiting the arrival of my L-rd, I said I do, but it is for a special guest. But I suppose I can spare some food and drink for you kind m'am. After I had fed the old beggar, she was off and on her way. Now it being nearly midnight, and still no sign of Jesus, there again a knock at my door. I hurried to answer it. It was not my L-rd, but a small child no more than eight or nine years of age. The young one was cold and hungry so I fed and clothed her and sent her to the shelter for warmth and board for Christmas night. Now the clock toned 4 am and yet no sign of My Savior. But wait, yet another knock at my door. I ran as fast as I could as to welcome my L-rd and Savior Jesus Christ for dinner, but to my dismay, it was yet another who was not my L-rd. This time it was a blind man, who was seeking shelter from the storm that had suddenly picked up. I took him in, fed him, clothed him, and put him up for the remainder of the night. As morning came, the blind man went on his way, and I was left to ponder why my L-rd G-d did not show. So I ask of him, **Why L-rd, Why did you not come when you said you were to come?** He replied with **Surely you know, For I did come. For I was the old beggar, the small child and the blind man. Although you were told to prepare a feast for me, you opened you home and gave your food to those in need. For that you have inherited my KINGDOM.**

So you see, When G-d said he was to come for dinner, and three who were not expected show, who were indeed G-d, Truly makes this a Christmas Miracle
The End

Word for Thought

Submitted By: Capt. ST Hobbs, CO

Where do our children learn parenting skills? They learn them from us.

When our children are very young, and grow into adulthood, they pick up on all the parenting skills that we were giving.

If you are arguing, and contradicting one another, then you are passing this type of parenting to your children. If you are agreeing with each other, and doing a good turn daily, such as letting a car turn left onto the road in front of you, then this also is being taught to your children.

If your children are dressing provocatively, acting provocatively, and/or swearing, then this too was a cause of your parenting. If your children are dressing in an ill manner or acting in an ill manner, then in a way you are saying to them that this is okay. So you try not letting them dress in an ill manner, but until you take their source away from them, that allows them to buy such clothing, then this type of behavior will continue. So you don't want to take their allowance away, okay, then find a better way for you to provide that to them, as so they will not buy items that are berating to society, such as giving their allowance to them in the form of credit, and then make a list of things they can purchase, then you do the purchasing for them.

There is no easy way around this, and it will be tough; but if you change the way you parent, then maybe your children's parenting skills will be better when they are parents.

I will now leave you with these words of wisdom...

... **"Obstacles are those frightful things you see when you take your eyes off your goal!" Henry Ford**
