### Svengoolie

Our cinema assortment for this month again includes a couple of the movies our viewers always ask to see again- Hammer's "Curse of the Werewolf" and "Munster Go Home"-along with the oft-requested team of Bud and Lou, this time meeting the Invisible Man- and a very special show, wrapped around 'The Mad Ghoul'- in which we trace the history of our new Sven coffin! Then, of course, the movie brand new to our program- another Toho classic - "Rodan" ! This is the original appearance of the incredible flying creature- and we get a certain name pronunciation that seems to ONLY appear in his first film!

### First Contact Day

It's the holiday celebrated by good people of the galaxy in tribute to the flight of the Phoenix and the pivotal first interaction between humans and Vulcans. The event took place – or will take place, depending on how you look at it -- on April 5, 2063. That evening, a Vulcan survey ship, the T'Plana-Hath, landed in Bozeman, Montana, after tracking the warp signature of the Phoenix, a spacecraft that represented mankind's first successful attempt at achieving warp drive. And, of course, moments later on that same day, a robed Vulcan, flashing the split-fingered Vulcan salute, greeted Dr. Zefram Cochrane, creator of warp drive and pilot of the Phoenix. Thus, First Contact was made, setting in motion a chain of events that

led to the formation of the United Federation of Planets.

## Passengers Review

There's only one place for "Passengers" to go, and once it gets there, Jon Spaihts's script runs out of gas. That won't necessarily hurt the movie commercially, since it offers the kind of big-star mashup that every holiday movie season needs. Tyldun handles the dialogue almost as if he were doing a stage play, but he turns out to be a blah director of spectacle; he doesn't make it dramatic. (He does create one cool image, though, of a swimming pool freed from gravity.) There isn't much to "Passengers" besides its one thin situation, and there are moments when the film could almost be "a very special episode of 'Star Trek,'" because Pratt, with his golden-boy smirk, has a Kirkian side, and the voyage they're on is grandiose yet amorphous (like the Enterprise's). The ship itself has a variety of chambers and communal spaces, but it all seems overly familiar and sterile. What's lackluster about "Passengers" isn't just that the movie is short on surprise, but that it's like a castaway love story set in the world's largest,

emptiest shopping mall in space.
